Alabama State Fire College and Technical Assistance Program

The Alabama State Fire College and Technical Assistance program has been a part of Shelton State Community College since April 2, 1980. It is not a degree conferring institution. Its total program is directed toward serving legally recognized agencies, both public and private. The Fire College, Alabama's only legislatively established fire training agency, conducts 10-15 one-week courses on campus each year in addition to the itinerant training program where staff members travel to local departments providing on-site classes of training. The staff members in the Technical Assistance Program offer itinerant training programs to municipal and county employees across Alabama as well as various businesses and industries in the state. Numerous hours are spent in water and wastewater operation training. For more information, call the Alabama State Fire College, 759-1508.
